

**IFM  
22W LAMP AND DIFFUSER INSTALLATION INSTRUCTIONS**

*The IFM Magnifier is supplied with a 22W T9 Circline Fluorescent Lamp.*

**\*\*BE SURE LAMP FIXTURE IS UNPLUGGED BEFORE INSTALLATION\*\***

**To install the lamp:**

1. Remove the clear plastic diffuser.
2. Diffuser is held in place by three (3) notched tabs that are part of the clear diffuser cover.
3. Gently push in one of the tabs and lift the diffuser from the shade. Gently push a second tab and disengage the diffuser from that tab. The diffuser will now lift off the shade assembly.
4. Remove the new 22W fluorescent tube from package.
5. Align the 4 brass pins from the lamp, with the 4 pin holes in the white connector hanging in the shade assembly.
6. Press the connector until all 4 pins are seated completely and the connector fits into the recessed area of the lamp.
7. Starting with the two spring clips farthest from the connector, engage the 22W fluorescent lamp with each of the spring clips.
8. Engage the spring clip next to the connector last making sure the female connector completely captures the brass pins of the 22W lamp.

**Installation of Clear Diffuser:**

1. The inside diameter of the diffuser has three (3) notched tabs.
2. Once the diffuser is aligned properly, the notched tabs will be inside the shade allowing them to hold it in place.
3. Be sure to press the diffuser down on each of these tabs to assure that the notch engages the diffuser with a firm click.
