The right light

Luxo's Solaris undercabinet lighting provides glare-free, adjustable illumination for any workspace.

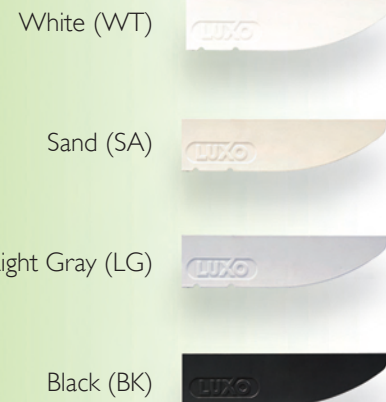

Uniquely elegant for an undercabinet light, the low-profile design effectively hides Solaris beneath the underside of an overhead storage cabinet or shelf. A choice of six sizes makes Solaris suitable for any size or shape workspace or application.

Through its combination of high-polished reflectors and proprietary diffusers, the Solaris' light output is unequaled. With either T5 or T8 fluorescent lightsources, and ergonomic light distribution, the Solaris effectively covers a larger workspace than other undercabinet lights. And it does so in a way that minimizes glare and shadows.

The Solaris' exclusive cord management system allows for right, center or left mounting flexibility at no extra charge.

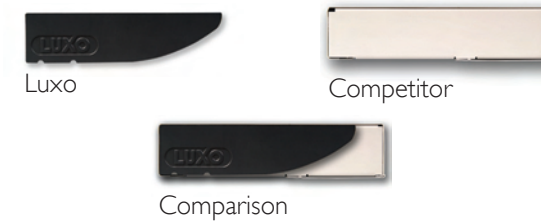

Solaris is housed in lightweight, environmentally-friendly aluminum and finished in a choice of white, sand, black or light gray. Metallic or custom RAL colors are also available.

Solaris features Luxo's unsurpassed quality and engineering and is backed by 70 years of ergonomic expertise.

Design Comparison:

Solaris' sleek design makes it nearly invisible when mounted to the underside of cabinets or shelves.

Solaris features a high-polished reflector yielding stronger, wider light output.

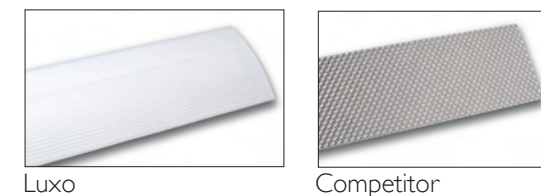

Models are individually sized to house T5 and T8 lightsources. Overall space inside the Solaris is minimized to eliminate dark, unlit areas and to maximize light output.

Solaris' lighter weight all-aluminum construction allows for easier installation.

Solaris' proprietary diffusers eliminate any unwanted glare by directing light asymmetrically across the worksurface.

A choice of six sizes makes Solaris suitable for any workspace.

Solaris' exclusive cord management system allows for flexible cord positioning.

Customizable end caps available (minimum order quantities apply).
