

LUXO, in conjunction with AIA/CES is proud to present

# The Energy Efficiency Paradox: The Critical Role of Lighting in Today's Green-Build Environment

While today's modern office may be a dramatic improvement over office spaces of the past, trends in furniture, building design and energy conservation have complicated our office environment by causing distractions, discomfort and disorientation for office workers. This presentation addresses these challenges and suggests ways to remedy them.

## Objectives:

- Learn modern trends that incorporate window glazing and reduced-glare lighting designed specifically for lower panel and open-office plans. Examine ways to manage complicated daylight issues without increasing glare and contrast issues.
- Learn simple fixes that can both enhance the work environment and also increase energy-efficiency by identifying, relocating and/or eliminating distractions.
- Learn about “Optical Radiation”, “Light Noise”, and other catch-phrases that are inundating our Ergonomics, Health and Safety, and Human Resource personnel.

## Provider: Luxo Corporation

Length: 60 minutes

Credits: 1.0 LEU

HSW: No

Method of Delivery: PowerPoint Presentation

Audio/Visual Required:

Projector & Computer (we will provide)

Cost to Participants:

No cost

Point of Contact:

David F. Shepard, IESNA

National Sales Manager, USA

Luxo Corporation, Industry Partner ASID

David Shepard, MBA, IESNA, Industry Partner ASID and National Sales Manager for Luxo, brings over a decade of experience in lighting and the associated issues and opportunities related to energy. He has worked closely with a wide variety of energy stakeholders and conservation groups, including DOE, CLTC, LBNL, PNNL and major utilities across the country. Dave does specialized training for architects and designers for meeting strict energy codes such as Title 24 while maintaining design aesthetics and proper light levels.

Established in 1934, Luxo Corporation has been a prominent supplier of luminaires for more than 75 years. With products designed to exceed industry standards, Luxo works with an international team of designers and architects to create outstanding lighting solutions for various areas and buildings. Well known as an innovator in the luminaire industry, Luxo is committed to supplying the right light through ergonomic and energy-efficient lighting solutions.
